Election/Restrictions

Restriction to one of the following Groups is required under 35 U.S.C. 121:

- I. Claims 41-48 and 50-52, are drawn to are drawn to an isolated polynucleotide that encodes a polypeptide 70-95% similar to Seq. ID No. 2, and the method of expressing the protein encoded by said polynucleotide in a transfected cell, classified, for example in class 536, subclass 23.1.
- II. Claims 49 and 53, are drawn to a pharmaceutical composition comprising a polypeptide, classified, for example, in class 514, subclass 2.

Group I is drawn to polynucleotides and the method of expressing the protein encoded by said polynucleotide in a transfected cell, whereas Group II is drawn to a pharmaceutical composition comprising a polypeptide. In the instant case, the search of the polynucleotides and polypeptides are not coextensive. The inventions of Groups I and II have a separate status in the art as shown by their different classifications. In cases such as this one where descriptive sequence information is provided, the sequences are separately searched in appropriate databases. There is search burden also in the non-patent literature. Prior to the concomitant isolation and expression of the sequence of interest there may be journal articles devoted solely to polypeptides which would not have described the polynucleotide. Similarly, there may have been "classical" genetics papers that had no knowledge of the polypeptide but spoke to the

Art Unit: 1649

gene. Searching, therefore is not coextensive. In addition, the polypeptide claims include polypeptides having 70% identity to the sequence identified (claim I). This search requires an extensive analysis of the art retrieved in a sequence search and will require an in-depth analysis of technical literature. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Attorney Deborah Nagel on September 2, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
